PassageView®

Remote Video Visitor Access & Photo ID Badging System

PassageView® Remote Video Access Management

QuickView® and **PassageView®** remote viewing & voice technologies have broad applications in industry, commerce, government, and daily life. We enable companies to enhance their ability to serve clients with real time remote viewing, alarm verification, access control, voice communication and recorded video retrieval.

PassageView® Visitor Access Control & Photo ID Badging

PassageView® will enable remote visitor viewing, voice communication, photo ID Badging and access by a remote intervention officer. View and communicate with up to **25Fps of Real-Time Video and Voice**, over a facility LAN/WAN. Operating with **QuickView®**, **PassageView®** will give the client live remote viewing capabilities, by utilizing existing CCTV systems.

PassageView® Multi-Tenant Management System

Secure visitor access to Multi-Tenant properties such as office buildings, rental housing, gated communities, co-op's, condominiums, private parking garages, etc. **PassageView®** will permit a

International Video Surveillance, LLC, 561-207-7227 Web: www.ivsco.com

remote intervention specialist to view, communicate, verify, permit or deny access, track ingress and egress. The **PassageView®** Security Management system has revolutionized visitor & vehicle access to secured properties. A **PassageView®** intervention officer can remotely ID anyone requesting access to a secure space. The officer can scan driver licenses, capture a live visitor photo and capture a video snapshot of the vehicle license plate. When authorization is confirmed a badge or vehicle pass can be printed with a photo ID and vehicle plate number and issued to the visitor. All recorded information is stored within a permanent data base file for egress tracking.

PassageView® School & College Campus Visitor Access

Secure visitor access to student campus', housing and public parking facilities. A visitor may be remotely authorized to enter a facility. A **PassageView®** intervention officer may remotely ID and photograph a visitor requesting access. A badge or vehicle pass can be printed with a photo ID and vehicle plate number and issued to the visitor.
